

USA High School Qualifications

The following information is provided to assist domestic students who have completed or are undertaking their senior secondary studies in the United States of America and intend to seek admission to undergraduate study at The University of Queensland (UQ).

About the USA High School qualifications

The USA High School Diploma is the standard senior secondary qualification in the USA and is also offered in a number of international schools worldwide. The typical study pattern is four years of full-time study and students will usually undertake one or more approved aptitude tests.

A completed USA High School Diploma (HSD) in combination with an aptitude test such as the Scholastic Aptitude Test (SAT-I) or the Enhanced ACT test can be assessed for admission into UQ undergraduate programs.

Advanced Placement (AP) Examinations that are issued by The College Board Advancement Placement Program, can also be assessed for admission into UQ undergraduate programs.

Entry requirements

For entry to all undergraduate programs at UQ applicants must meet two basic entry requirements:

1. Eligibility (i.e. satisfy the subject prerequisites and other requirements)
2. Merit (i.e. possess a selection rank high enough for a place in the program†)

† Selection ranks range from 1 to 99 (maximum). As admission is competitive the minimum selection thresholds for programs can fluctuate from year to year.

For detailed program information, including prerequisite requirements and minimum selection thresholds from previous admission periods, please refer to future-students.uq.edu.au.

Satisfying subject prerequisites

The USA High School Diploma in combination with an approved aptitude test (such as SAT-I) will meet the English subject prerequisite. Achieving the minimum scores in the Mathematics section of the SAT-I or ACT, or passing AP Statistics can meet the Mathematics A subject prerequisite.

Only Advanced Placement (AP) subjects, which are accredited by the College Board, can meet Mathematics B and Science subject prerequisites for UQ undergraduate programs.

The successful completion of the following AP subjects at the specified grade level will meet the listed subject prerequisites for admission to all UQ undergraduate programs.

Advanced Placement (AP) subjects, ACT or SAT-I result	Qld Year 12 Subject Prerequisites
AP Statistics ACT Mathematics section score of 22 SAT-I Mathematics section score of 530	Mathematics A (4,SA)
AP Calculus	Mathematics B (4,SA)
AP Biology/ Biological Science	Biological Science (4,SA)
AP Chemistry	Chemistry (4,SA)
AP Physics	Physics (4,SA)
AP English OR Completed USA HSD + Aptitude Test (SAT-I or ACT)	English (4, SA)

Minimum grade in AP subjects required to pass prerequisites: Grade of 3.

USA High School Qualifications

GAINING A SELECTION RANK

Results from the Scholastic Aptitude Test (SAT-I) and Enhanced ACT (ACT) Test can be assigned selection ranks where evidence of the completion of the USA High School Diploma is also provided.

Please note, a completed USA High School Diploma on its own without the SAT-I or ACT result cannot be assigned a selection rank. A selection rank can also be derived from Advanced Placement (AP) Examinations that are issued by The College Board Advancement Placement Program with a minimum of two AP subjects.

¹ Applicants must provide evidence of completion of the equivalent Year 12 secondary studies to be assigned a rank from this schedule.

² Applicants must provide AP results as issued by The College Board Advanced Placement Program. AP results recorded as part of a High School Academic Record are not acceptable for assessment purposes.

³ A minimum of two and a maximum of four APs may be used. Aggregate to be determined from the numerical values allocated to subjects where: A=5, B=4, C=3 (Pass), D=2, E=1. When more than four APs have been taken, determine the aggregate using the best four results.
